PROFILE

Fullstack Developer with 6 years of experience, graduated in Systems Analysis and Development and post-graduate in Digital Security, Governance, and Data Management. Solid experience in developing complete systems, from front-end to back-end, using technologies such as JavaScript, PHP, Golang, and their frameworks (Vue.js, React, Laravel). Focus on clean, well-structured code and version control.

WORK EXPERIENCE

Sagui AI | Full Stack Developer

January 2023 – March 2025

- Worked on the development of a platform focused on automation and digital marketing.
- Developed modules and integrated AI technologies to generate marketing materials such as websites, blog posts, social media content, emails, landing pages, and bio links.
- Contributed to migrating the codebase to Vue 3 and Nuxt, adopting best practices and incorporating tests to ensure quality and stability.
- Implemented reusable, scalable, and accessible components, enhancing user experience and system maintainability.

Mobile Mind | Full Stack Developer

February 2022 – January 2023

- Led the update of the company's website, migrating it to React, resulting in a more attractive interface and an improved user experience.
- Developed and implemented a CRM system, enhancing the management and tracking of customer interactions.
- Identified and resolved SQL bottlenecks, improving the website's performance and ensuring greater stability and availability.
- Worked on the development of a service provider search platform (Busca Zum) using Golang and React.

Tecnosistemas | Web Developer Intern

February 2021 – July 2021

- Reviewed and updated legacy system functionalities, improving efficiency and usability.
- Collaborated with the development team to design, test, and implement a billing module on the company's website, making the invoicing and payment process faster and more efficient for customers.

Érika Dal Magro

Full Stack Developer

WORK EXPERIENCE

**Brazilian Agricultural Research Corporation - EMBRAPA |
Web Developer Intern**
January 2018 – December 2018

- Worked on modernizing the company's old intranet system, implementing improvements that optimized internal processes and enhanced the user experience.
- Developed the system's documentation and user guides, as there was no existing documentation in the previous version.
- Supported the company's team in adapting to the new features by providing training and guidance.

EXTENSION PROJECTS

OfMakers: Teaching Computer Science and Raspberry Pi
December 2020 – June 2021

- Took part in a project aimed at teaching basic computer science and programming concepts using Raspberry Pi to elementary school students.
- Assisted in planning and conducting hands-on activities and lessons, as well as evaluating students' learning and progress.

My Virtual School - Distance Learning Course for Teachers
May 2016 – November 2016

- Participated in a program that aimed to provide teachers with the tools and knowledge needed to effectively implement distance learning in their classrooms.
- Developed and delivered online courses and training materials for teachers.
- Contributed to the monitoring and evaluation of participant performance.
